Visionary Mobilizes for up to 4,500 Metres of Diamond Drilling to Test Eight Separate Magmatic Nickel and Copper Sulfide Targets at King Solomon and Tin Cup Projects in Wyoming

Vancouver, British Columbia – Newsfile Corp. – Wednesday, August 26, 2026 – Visionary Metals Corp. (TSXV: VIZ) ("Visionary" or the "Company") is pleased to announce that it has completed permitting at its King Solomon and Tin Cup nickel and copper sulfide projects in Fremont County, Wyoming and is currently mobilizing equipment and personnel in preparation for drilling.

Visionary's 2026 drill program is being advanced under the Exploration Alliance with Teck American Incorporated ("Teck"), a subsidiary of Teck Resources Limited, which has provided equity and non-dilutive direct funding together with project technical oversight (see news release dated July 31, 2025).

Drilling will begin in late August at King Solomon to test three discrete, high-conductance features at the site of Wyoming's first nickel sulfide discovery (see news releases dated March 6, 2023 and March 2, 2026) that are considered highly prospective for nickel- and copper-bearing massive sulfide ores. A total of 1,500 metres of diamond drilling has been permitted at King Solomon.

Once King Solomon drilling is completed, Visionary plans to mobilize the rig to the Tin Cup project, 10 km west of King Solomon, to test five separate large conductive bodies associated with mafic and ultramafic rock, and along trends of elevated nickel, copper and chromium in rock and soil surface samples (see news releases dated July 19, 2023 and March 2, 2026). A total of 3,000 metres of diamond drilling has been permitted at Tin Cup.

In total, eight separate conductive features will be tested at King Solomon and Tin Cup in 2026. These targets were refined through airborne VTEM™ and subsequent ground fixed-loop time-domain electromagnetic ("FLTEM") surveys completed in 2025.

In addition to diamond drilling, Visionary plans to conduct borehole and ground-based FLTEM surveys to test for possible extensions of suspected massive sulfide mineralization at both projects. These geophysical programs are supported in part by the recently awarded US$250,000 Wyoming Energy Matching Funds grant (see news release dated July 7, 2026) and will again be completed by Dias Geophysical using the same system specifications as the successful 2025/2026 surveys.

"The targets we have identified at King Solomon and Tin Cup exhibit geochemical and geophysical characteristics routinely observed at other world-class magmatic nickel and copper sulfide districts, and we are excited to see if we can make a world-class discovery with this year's drill program," said Wes Adams, CEO of Visionary Metals. "We're now in a position to test eight separate high-priority targets across two projects."

FLTEM and Borehole Survey Specifications and Disclosure

Ground FLTEM and borehole TEM surveys will again be completed by Dias Geophysical consistent with the surveys reported on January 13, 2026, and March 2, 2026. Modelled plates are discrete and consistent with conductive magmatic sulfides; however, conductivity anomalies are indicative only, can have multiple sources and do not guarantee economic mineralization. They are particularly useful for targeting drill holes.

About Visionary Metals Corp.

Visionary Metals Corp. is a Vancouver-based exploration company with two paths to value creation for shareholders: advancement of two nickel and copper sulfide projects within a 40 km² land package in Wyoming's Granite Mountains ; and the exploration of the newly acquired Slipstream copper-gold-silver porphyry project spanning tier-one mining jurisdictions of Utah and Nevada. Visionary aims to create value for shareholders by systematically advancing these assets toward discovery and resource definition to become a leading explorer and future developer of U.S. nickel, copper, gold and silver projects.

FORWARD-LOOKING STATEMENTS

This news release contains statements that constitute "forward-looking statements." Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements, or developments in the industry to differ materially from the anticipated results, performance or achievements expressed or implied by such forward-looking statements. Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects," "plans," "anticipates," "believes," "intends," "estimates," "projects," "potential" and similar expressions, or that events or conditions "will," "would," "may," "could" or "should" occur.

Forward-looking statements in this document include statements regarding the Company's expectations regarding the commencement and timing of exploration activities by the Company, the expected results of such activities, the use of proceeds from any funding, the Company's business prospects and other statements that are not historical facts. By their nature, forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements, or other future events, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors and risks include, among others: the Company may choose to defer, accelerate or abandon its exploration plans; the availability of equipment and personnel; new laws or regulations and/or unforeseen events could adversely affect the Company's business and results of operations; stock markets have experienced volatility that often has been unrelated to the performance of companies and such volatility may adversely affect the price of the Company's securities regardless of its operating performance risks generally associated with the exploration for and production of resources; the uncertainty of estimates and projections relating to expenses; constraint in the availability of services; commodity price and exchange rate fluctuations; adverse weather conditions; and uncertainties resulting from potential delays or changes in plans with respect to exploration or development projects or capital expenditures.

When relying on forward-looking statements and information to make decisions, investors and others should carefully consider the foregoing factors and risks and other uncertainties and potential events. The Company has assumed that the material factors referred to in the previous paragraphs will not cause such forward-looking statements and information to differ materially from actual results or events. However, the list of these factors is not exhaustive and is subject to change and there can be no assurance that such assumptions will reflect the actual outcome of such items or factors. The reader is cautioned not to place undue reliance on any forward-looking information. Such information, although considered reasonable by management at the time of preparation, may prove to be incorrect and actual results may differ materially from those anticipated. Forward-looking statements contained in this press release are expressly qualified by this cautionary statement. The forward-looking statements contained in this press release are made as of the date of this press release. The Company does not intend, and expressly disclaims any intention or obligation to, update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as required by law.
